

China Coal Technology and Engineering Group(CCTEG) visits Famous

Düsseldorf, Germany – On Thursday, the 23rd of May 2013, a delegation of the China Coal Technology and Engineering Group (CCTEG) visited the Famous Industrial Group in Düsseldorf, Germany. The delegation consisted of members of the corporate leadership as well as chief engineers of various departments. The delegation was lead by Director Prof. Luo Qingji.

As a research and development company, CCTEG has managed to establish itself as a well regarded brand in China with well known developments in environmentally friendly, as well as safe technologies. The company currently holds over 80 patents for its developments in the coal mining sector. Their developments include products such as:

- Boom roadheaders
- Thin seam shearing machines
- Hydraulic support for longwall mining
- Flexional armoured face conveyors
- Emulsion pump stations
- Flame-proof low-pollution vehicles
- Mobile roof support
- Continuous haulage systems

After a tour of Famous Industrial Group, as well as a short company presentation, Party Secretary Prof. Luo and the Vice General Manager of Famous Industrial Group, Mr. Alexander Zisser, discussed possible future cooperations between CCTEG and Famous.

On 24th of May 2013 the delegation visited two other companies in Germany, one of them is Mössinger+Wolter in Bochum and the other is GTA Maschinensysteme in Hamminkeln.
