

China Coal Technology and Engineering Group(CCTEG) visits Famous

Düsseldorf, Germany – On Wednesday, the 14th of June 2017, a delegation of the China Coal Technology and Engineering Group (CCTEG) visited the Famous Industrial Group in Düsseldorf, Germany. The delegation consisted of members of the corporate leadership as well as chief engineers of various departments. The delegation was lead by Vice General Manager of Xi'an Institute of CCTEG Mr. Hengtang Li.

As a research and development company, CCTEG has managed to establish itself as a well-regarded brand in China with well known developments in environmentally friendly, as well as safe technologies. The company currently holds over 80 patents for its developments in the coal mining sector. Their developments include products such as:

- Boom roadheaders
- Thin seam shearing machines
- Hydraulic support for longwall mining
- Flexional armoured face conveyors
- Emulsion pump stations
- Flame-proof low-pollution vehicles
- Mobile roof support
- Continuous haulage systems

After a tour of Famous Industrial Group, as well as a short company presentation, Mr. Li and the Vice General Manager of Famous Industrial Group, Mr. Alexander Zisser, and the General Manager Assistant Mr. Yuhang Hu, discussed potential future cooperations between CCTEG and Famous.

On 16th of June 2017 the delegation was invited to visit Famous again and both sides discussed further opportunities for future cooperation.
